PROFILE

Passionate about Web development combines the Front-end that shows the visual results and the Back-end that handles the database and server. Looking for an opportunity that helps to improve web development skills. Willing to add to my knowledge and technology skills of work and eager to improve problem-solving skills.

EDUCATION

Sogang University, Computer Science and Engineering (2015 ~)

Courses Completed

- JAVA Language Programming
- Systems Programming
- Operating System
- Advanced Software Practices
- Programming Languages
- Data Structures
- Design and Analysis of Algorithms

PROJECT EXPERIENCE

Front-end developer in 'Knowru' (March, 2019 - November, 2019)

'Knowru' is a company that sells various B2B software that uses machine learning and AI in the U.S., India, Indonesia, and China. (Knowru homepage : <https://www.knowru.com>)

- Remote Recruitment Website **AI Interview** (<https://www.ai-interview.com>)
AI Interview was developed with Vue.js (Vuex) and AWS serverless service. I made HTML components with Vuex and manipulated lambda functions, managed an ORM table with SQLAlchemy, sqlalchemy. Also I implemented a responsive web with Sass mixin.
- Remote Loan Counseling Website **Video-KYC**
Video-KYC was developed with React.js (Redux), Python Flask and Websocket on Ubuntu environment. I Implemented a video interview with WebRTC and had been communicating with developers in China. Because it sells to China credit loans aren't commercialized.

Web developer in 'Childly' (November, 2019 - December, 2019)

'Childly' is a company that runs cryptocurrency exchange and studies crypto and commodity money.

- Cryptocurrency Exchange Website **Dove wallet** (<https://www.dovewallet.com>)
Dove wallet was developed with Vue.js, Node.js and Websocket. To smooth websocket works, I wrote javascript code and debugged using VScode. Using the 'screen' command, I worked in several shells and programs in the Ubuntu environment.

Web developer in 'Ziontech Solution' (February, 2020 - November, 2020)

'Ziontech Solution' is a company that serves efficient human resources management software .

- Human Resource Management Software **Wavity** (<https://www.wavity.com>)
Wavity was developed with Angular, Node.js and Java. The website that I worked on had long load-times. I cut load-times by minimizing HTTP requests and determined which queries were really needed. I could improve the performance by 2x.

TECHNICAL SKILL

JavaScript,, C, C++, Python, Vue.js, React.js, Angular, Node.js, HTML/CSS, Git, Ubuntu
